PROFESSIONAL SUMMARY

Software Engineering Intern with experience in Angular, TypeScript, Python, REST API integration, and AI-powered applications. Skilled in frontend development, automation, testing, enterprise application modernization, and CI/CD workflows. Experienced in Agile development, code reviews, unit testing, Docker image creation, deployment pipeline execution, and application deployment across multiple environments using Git-based version control.

EXPERIENCE

ABB India Ltd. | Software Engineering Intern

FEB 2026 – Present

- Migrated MCS AI Assist application from Angular 18 to Angular 20, ensuring compatibility with latest framework features and improving maintainability.
- Developed Custom Prompt Management feature with create, edit, delete, RBAC, and personalization capabilities.
- Implemented Download Transcript functionality for exporting AI conversations.
- Performed code reviews and collaborated with cross-functional teams.
- Built Python-based AI Response Consistency Validation framework using semantic similarity analysis.
- Participated in Agile sprint planning and daily stand-ups.
- Performed deployment verification, environment validation, and release testing across multiple instances.

TECHNICAL SKILLS

LANGUAGES - Python, SQL, C++, JavaScript, TypeScript

DATABASES - MongoDB, MySQL

FRONTEND - Angular, HTML, CSS

BACKEND - REST APIs, API Integration, FastAPI

QA & AUTOMATION - Python Automation, Functional Testing, Unit Testing, Test Planning, UI Automation

DEVELOPMENT PRACTICE - Agile, Scrum, Version Control, Code Review

TOOLS - Git, GitHub, VS Code, Postman, GitHub Copilot, DBeaver

PROJECTS

Asset Health Monitoring System

Python, Flask, MongoDB, Streamlit, REST APIs

- Developed a real-time asset monitoring solution using Flask, Streamlit, MongoDB, and Python.
- Implemented asset health classification and visualization dashboards.

AI-Based Drone Detection & Tracking System

YOLOv8, OpenCV, Raspberry Pi 5, Python

- Developed a real-time drone detection and tracking system.
- Implemented multimodal sensor fusion, autonomous tracking, live video streaming, and alert generation.

Indoor Plant Monitoring

ESP32, DHT22, ThingSpeak, Python

- Developed an IoT-based plant monitoring system using ESP32 and DHT22.
- Enabled real-time environmental monitoring and fungal-risk estimation.

EDUCATION

B.S. Abdur Rahman Crescent Institute	B.Tech(ECE)	2022 - 2026
Vels Vidyashram	12th(CBSE)	2021 - 2022
Vels Vidyashram	10th(CBSE)	2019 - 2020

CERTIFICATIONS

Data Analytics with Python	NPTEL
Introduction to Industry 4.0 and Industrial Internet of Things	NPTEL
Computer Vision	NPTEL
Cloud computing fundamentals	Udemy

ACHIEVEMENTS

CRESATHON'23 - First Place (An Intra-College Hackathon)	2023
